

MOHAMED ABOOBACKER FATHIMA REESMAN

Aspiring Software Developer | Software Engineering Intern

Kalmunai, Sri Lanka | +94 76 008 4046 | reesman1429@gmail.com

LinkedIn: linkedin.com/in/reesman14 | GitHub: github.com/reesmanmaf14

PROFESSIONAL SUMMARY

HNDIT undergraduate specializing in Software Engineering with hands-on full-stack web development experience in Java, C#, PHP, JavaScript, HTML, CSS, Bootstrap, and MySQL. Independently designed and delivered a complete web-based clinic management system as a final-year project. Seeking a Software Engineering / Software Development internship to apply technical skills and contribute to real-world projects within a professional development team.

EDUCATION

Higher National Diploma in Information Technology (HNDIT) — Software Engineering

SLIATE — Advanced Technological Institute (ATI), Sammanthurai | 2024 – 2028 (Expected) | GPA: 4.00

Relevant Coursework: Software Engineering, Object-Oriented Programming, Database Management Systems, Web Development, Machine Learning

Mahmud Ladies College (National School) — Grade 10 to G.C.E. Advanced Level

TECHNICAL SKILLS

Programming Languages: Java, C#, PHP, JavaScript

Frontend Technologies: HTML5, CSS3, Bootstrap

Backend & Frameworks: PHP, Laravel

Databases: MySQL, Database Design

Tools & Platforms: GitHub, Git, Visual Studio Code, IntelliJ IDEA, Figma

Core Competencies: Requirements Analysis, System Design, Web Application Development, Testing & Debugging, Technical Documentation, UI/UX Design

PROJECTS

SpeechCare — Web-Based Application for Speech Therapy Clinics (Final-Year Academic Project)

Technologies: HTML, CSS, JavaScript, Bootstrap, PHP, MySQL | GitHub: github.com/reesmanmaf14/SpeechCare

- Independently designed and developed a centralized web platform connecting parents, therapists, and administrators, digitizing manual clinic processes to improve accessibility, organization, and efficiency of speech therapy service management.
- Implemented role-based user authentication for three user types (parents, therapists, administrators) with secure access control.
- Built an online appointment booking system with automated time-slot generation based on therapist availability, including status tracking, scheduling updates, and double-booking prevention.
- Developed child progress tracking with therapy session notes and progress history management to support continuity of care.
- Engineered a notification system with in-app alerts and email notifications for appointments, approvals, cancellations, and updates.
- Managed the full software development lifecycle: requirements analysis, system and database design, frontend and backend development, testing, debugging, and project documentation.

Book Selling Application — Desktop-Based Bookshop Management (First Year Group Project)

Technologies: C# (Windows Forms), .NET Framework, Microsoft SQL Server | GitHub:

github.com/reesmanmaf14/Book-Selling-App

- Collaborated as a team member to design and develop a desktop-based book selling application that digitizes book management and purchasing processes for administrators and users.
- Developed category-based book browsing functionality using a ComboBox interface, enabling users to quickly filter and view available books based on selected categories.
- Implemented administrator features for adding, updating, and managing book records, including book details such as title, author, quantity, and price.
- Contributed to user-side functionalities including book selection, order placement, bill generation, and order history management.
- Designed database interactions for efficient storage and retrieval of book, user, and order information using SQL Server.
- Participated in the software development lifecycle including requirements analysis, UI design, coding, debugging, testing, and documentation while collaborating with team members.

ACHIEVEMENTS

- HNDIT Software Engineering: 4.00 GPA
- G.C.E. Ordinary Level (O/L): 9 A passes
- G.C.E. Advanced Level (A/L): 1 C pass and 2 S passes (Biology Stream)

LANGUAGES & INTERESTS

Languages: Tamil (Native), English (Fluent), Sinhala (Basic Understanding)

Interests: Web Development, Software Engineering, Artificial Intelligence, UI/UX Design
